

LONDON BOROUGH OF HAVERING

ENGAYNE PRIMARY SCHOOL

Headteacher: Mrs S Sankey

01708 223492

Dear Parents/Carers,

All students in Years Two to Six, and now Reception and Year 1, are subscribed to **Mathletics**. It has proven extremely popular, with the children showing great enthusiasm for the site.

Mathletics gives the children the opportunity to practise their maths at home, by completing short activities which are matched to their ability.

Activities: Children should be aiming to complete at least two a week. If your child has difficulty with any of these activities, there is a question mark button which they can click to give them advice.

Live Mathletics: The children can also compete online against other children from their class, their school or even all over the World. It is important they try and spend time on Live Mathletics as this really helps their mental maths.

Subscription would normally cost £39 for an individual child outside of school, but, through the school maths department, we are able to provide this for free.

Incentives are provided for the children to take part:

- Points, which the children can use to improve their avatar.
- Certificates, for gaining certain numbers of points.

There are two main ways to access Mathletics:

Computer or Laptop: Go onto the website www.mathletics.co.uk. You may need to install Flash Player for this to work smoothly.

Any tablet: Do not try to access Mathletics through the internet on a tablet. It works far better as an app, which can be downloaded for free from stores such as iTunes and Google Play.

If your child absolutely cannot access Mathletics from home, please let their class teacher know.

Yours sincerely,

Mr M. Baker
